2/ See the contracts for yourself in the above link. 🖐️

First, in democratic societies, the people, NOT the government, --NOT for-profit corporations count the votes. Maybe next year Fox News will get the ballot counting contract. Or Facebook. Or your most distrusted corporation.

3/ Not only have they outsourced the ballot design and ballot counting formulas to a sketchy corporation with ties to Kemp, but used voting machines that cannot be audited. No accountability whatsoever. No one can check the actual tallies.

4/ He who controls the tabulation software controls the election results.

What could possibly go wrong??

The story gets worse. Stay tuned.

5/ BTW, we learned this on the 2nd anniversary of this righteous lawsuit. It is taking a huge investment to fight the State and their tactics. Please help if you can.
